

Your Surgery Day

Your surgery is on: _____ (date)

A nurse will call with your arrival time and review any instructions. If you haven't heard from us by the evening before surgery—or you have questions on the day of surgery—call your surgery center.

Getting ready

Please review your to-do list in [Preparing for Your Surgery](#). If you haven't yet received this, call your surgery center to ask for a copy.

Before surgery, you may need to stop some medicines and keep taking others. Ask your family clinic or heart clinic for instructions, especially if you get different advice from different people.

Medicines you may need to stop

Your care team may ask you to stop taking:

- Supplements and vitamins (usually 7 days before surgery)
- Medicines that can increase bleeding (including aspirin, ibuprofen, Aleve)
- Blood thinners, such as warfarin (Coumadin)
- Other medicines.

These medicines differ a lot in when to stop. Again, talk to your family clinic or heart clinic.

Medicines you may need to keep taking

- You may need to keep taking certain medicines the day of surgery. Please also review these with your care team.
- If you take insulin, your dose will change the day of and the day before surgery. Follow your care team's orders.

Important phone numbers

- **Interpreter Services:** 612-273-3780
- **Billing:** 612-672-6724

Surgery center locations
